# Overview

- A Grammar Library for Information Structure
  - Information Structure
    - meanings: focus, topic, contrast, background
    - markings: prosody, lexical markers, syntactic positioning
  - Individual Constraints (ICONS): MRS-based representation
  - ACE
    - regression tests
    - multilingual machine translation: text/sentence-based processing

- 1 Individual Constraints
  - Motivation
  - Type Hierarchies
  - Sample Representations
  
- 2 MMT
  - ACE
  - Basic Machinery
  - Grammars
  - Evaluation
  
- 3 Progress & Plan

  - Sample Representations
  
- 2 MMT
  - ACE
  - Basic Machinery
  - Grammars
  - Evaluation
  
- 3 Progress & Plan

# Motivation

Using ICONS is motivated by three necessities.

- morphosyntactic **markings** (*mkg*) vs. semantic **representation** (*info-str*): resolving discrepancies between forms and meanings in information structure

- **underspecification**: facilitating underspecifiability for allowing flexible and partial constraints

inu wa hoeru.

dog TOP bark

'The **dog** barks.' [jpn]

- **multiclausal constructions**: capturing a binary relation of information structural components

The dog that Kim chases barks.

# The DOG barks.

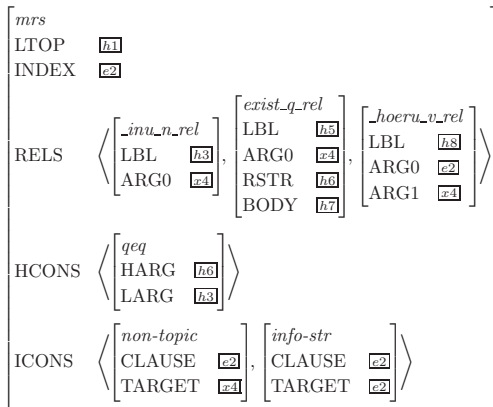

# MRS & Dependency Graphs

## inu ga hoeru.

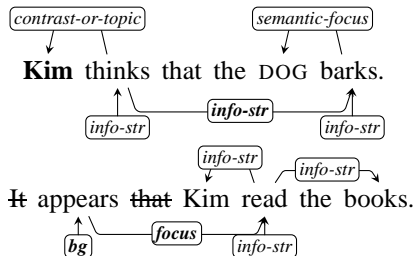

# MRS & Dependency Graphs

# Multiclausal Constructions

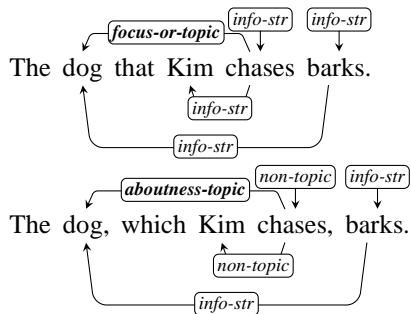

- complement clauses: verbs of saying (“say”), semi-factive verbs (“realize”), and quasi-evidential verbs (“it appears”)
- relative clauses: restrictive vs. non-restrictive
- adverbial clauses: preposed *when/if* clauses

# Complement Clauses

## config.tdl

```
enable-icons := yes.  
mrs-icons-list := ICONS LIST.  
icons-left := CLAUSE.  
icons-right := TARGET.
```

# English

The dog-**a** barks [ ICONS: < e2 **semantic-focus** x4, e2 info-str e2 > ]

(i) The dog barks

(ii) The dog-a barks

(iii) The dog barks-a

(iv) The dog-a barks-a

(v) ~~The dog-b barks~~

(vi) ~~The dog-b barks-a~~

# Japanese

inu **ga** hoeru [ ICONS: < e2 **non-topic** x4, e2 info-str e2 > ]

(i) inu ga hoeru

(ii) ~~inu wa hoeru~~

(iii) inu hoeru

# Translation

- a. The dog-**a** barks [ ICONS: < e2 **semantic-focus** x4, e2 info-str e2 > ]
- (i) inu ga hoeru
  - (ii) ~~inu wa hoeru~~
  - (iii) ~~inu hoeru~~
- b. inu **ga** hoeru [ ICONS: < e2 **non-topic** x4, e2 info-str e2 > ]
- (i) The dog barks
  - (ii) The dog-a barks
  - (iii) The dog barks-a
  - (iv) The dog-a barks-a
  - (v) ~~The dog b barks~~
  - (vi) ~~The dog b barks-a~~

# Grammars: sobaka

- Pseudo Grammars: CN IV / PN TV CN
- Illustrative Grammars
  - English: prosody
  - Korean: affixes, scrambling
  - Japanese: adpositions, scrambling
  - Russian: modifiers, word order (cf. Varya Gracheva)
  - Spanish: *pro*-drop, clitic left dislocation
- Resource Grammars
  - ERG: discourse relations (focus\_d\_rel, parg\_d\_rel, itcleft\_d\_rel)
  - JaCY: adpositions, scrambling

# MMT script

- using ACE
- running all tasks in an automatic way at once
  - parsing, transfer, generation
  - all directions ( $n \times n$ )
- creating PDF files
  - ling567
- providing a report

# Test Suites

- Currently, 178 sentences +  $\alpha$ 
  - information structure-related phenomena
    - common: embedded clauses, argument structure, ...
    - language-specific: lexical markers, scrambling, *pro*-drop, left dislocation, ...
- In the future,
  - a bitext: the Tanaka corpus
  - a naturally occurring text: *The Adventure of the Speckled Band* out of the *Sherlock Holmes* stories

- 1 Individual Constraints
  - Motivation
  - Type Hierarchies
  - Sample Representations
- 2 MMT
  - ACE
  - Basic Machinery
  - Grammars
  - Evaluation
- 3 Progress & Plan

## What I have done so far

- a cross-linguistic survey
- a corpus study
- an information structure library
- grammars: pseudo / illustrative (eng, jpn, kor, rus) / ERG
- MMT settings

# What I have to do soon

- grammars: illustrative (spa) / ERG / JaCY
- MMT evaluation
- a journal article

# Issues

- focus projection
- other processors
- other grammars
- regression test
- unbound relations
