The grammar Matrix in individual grammars

delph-in 2014

Grammar Matrix

- ``top-down'' approach to sharing implementations across grammars

- Ideally: bottom up feedback from individual grammars

- In practice: only if grammar is developed by a Grammar Matrix developer

Investigating the Grammar Matrix

- After 12 years of Grammar Matrix, how is it used?

  - What changes do grammar engineers make?

  - Which parts do they use and which don't they?

  - Can we improve sharing?

Idea

- First analysis of types that are used, changes that are made in Fokkens (to appear).

- For a complete analysis: input of grammar engineers is required

- Step 1: joint journal paper on the Grammar Matrix in individual grammars

- Starting during SIG
